

Senior Bridge Engineer

Are you a passionate bridge engineer ready to take your career to the next level? Arcadis is seeking a Senior Bridge Engineer to join our Ohio Bridge Team, with opportunities to work out of our Columbus, Akron, or Cleveland offices. This is your chance to showcase your technical expertise and leadership skills at a firm renowned for its collaborative culture and innovative solutions.

In this role, you'll serve as the technical lead for a variety of infrastructure projects—ranging from new bridge construction to inspection, repair, and rehabilitation. You'll guide and mentor junior engineers and CAD technicians, while collaborating closely with colleagues across disciplines and offices. Your responsibilities will include reviewing technical packages as part of our internal quality program and as an owner's representative, delivering high-quality plans and specifications, completing bridge inspections and load ratings, and supporting proposal preparation for new project pursuits.

We're looking for candidates with a bachelor's degree in civil engineering (or related field) and at least 10 years of bridge design experience, including 5 years working with ODOT standards. A valid Ohio PE (or the ability to obtain within 6 months) and a driver's license are essential. Experience with AASHTO LRFD, ODOT design criteria, bridge inspection, and structural engineering software such as Bentley Open Bridge Designer, MIDAS Civil, and MathCAD is highly valued.

Arcadis offers benefits for full-time and part time positions. These benefits include medical, dental, and vision, EAP, 401K, STD, LTD, AD&D, life insurance, paid parental leave, reward & recognition program and optional benefits including wellbeing benefits, adoption assistance and tuition reimbursement. We offer nine paid holidays and 20 days PTO that accrue per year.

If you're ready to make a meaningful impact on Ohio's infrastructure, work independently with minimal oversight, and help shape the next generation of bridge engineers, we'd love to hear from you! Click on the link below to apply today and represent Arcadis at the forefront of the industry.
